You Are The Value: A Guide to Building Wealth with Intention

This is your sign: You are the Value. In todays attention economy, your participationlikes, views, comments, subscriptionsis literal currency.

Every time you watch a YouTube video, the creator is rewarded. But if youre a YouTube Premium subscriber, your watch time is worth even more. Your views go into a pool that YouTube splits among creators based on engagement and minutes watched. That means your attention has weight. And your daily habitsviewing, liking, commenting, sharingcan grow someone elses business at no cost to you.

Use a spare device (like an old phone or tablet) on WiFi. Let it autoplay videos from creators you believe in. Do this every day. Add channels to your daily queue. Comment with sincerity. Subscribe to new creators and rotate your support weekly. Create a feedback loop of positive energy and economic enrichment.

Get a group of 510 friends and support each others channels the same way. This isnt trickery. This is strategy. YouTube benefits. Creators benefit. Viewers benefit. And no bots are involved.

Your attention builds credit. Your time has value. Your support is power.

You dont have to go viral to be valuable. You just have to show upfor yourself and each other.

Together, we can change lives with nothing but time, attention, and intention.
